

HILLSBOROUGH TOWNSHIP SCHOOL DISTRICT

MATHEMATICS CURRICULUM

Calculus

July, 2020

Course Overview

The Calculus curriculum is designed to provide students a thorough understanding of both Differential Calculus and Integral Calculus. Concepts will be investigated analytically, graphically, and numerically. Students will be expected to relate various representations to each other.

The course will present concepts including, but not limited to: limits, differentiation, applications of differentiation, integration and applications of integration.

Throughout the course students will use a variety of strategies and tools to gain a solid understanding of the material. Digital technology will enhance the educational experience by allowing lessons to become more interactive and inquiry-based.

The course is structured around the New Jersey Student Learning Standards. The curriculum will reflect various teaching strategies and offer opportunities for enrichment and reinforcement based on individual need.

Hillsborough Township Public Schools
Calculus CP Mathematics Curriculum

Unit Title: Unit 1 Foundations	Timeframe/Pacing: 15 days
<p>Essential Questions</p> <ul style="list-style-type: none"> ● What does a solution look like? ● What parts of the problem/expression are most important? ● How can I change the structure of a function or expression to make a specific form? ● What does the structure of a function tell me about its graph? 	
<p>Enduring Understandings</p> <ul style="list-style-type: none"> ● The structures of an equation play an important part in the process of finding a solution. ● A series of common simplifying practices leads to a common notation of a final solution. ● Each type of elementary function has a particular structure, and all transformation properties can apply to manipulate the graph. 	
<p>Standards Taught and Assessed</p> <ul style="list-style-type: none"> ● F-IF.B.2: Use function notation, evaluate functions for inputs in their domains, and interpret statements that use function notation in terms of a context. ● F-IF.C.7.d. (+) Graph rational functions, identifying zeros and asymptotes when suitable factorizations are available, and showing end behavior. ● F-IF.A.2 Use function notation, evaluate functions for inputs in their domains, and interpret statements that use function notation in terms of a context. ● F-TF.A.3 Use special triangles to determine geometrically the values of sine, cosine, tangent for $\pi/3$, $\pi/4$ and $\pi/6$, and use the unit circle to express the values of sine, cosines, and tangent for πx, $\pi+x$, and $2\pi-x$ in terms of their values for x, where x is any real number. ● A-CED.A.4 Rearrange formulas to highlight a quantity of interest, using the same reasoning as in solving equations. For example, rearrange Ohm's law $V = IR$ to highlight resistance R 	
<p>Highlighted Interdisciplinary Connections</p> <ul style="list-style-type: none"> ● Computer Science and Design Thinking: 8.1.12.DA.5: Create data visualizations from large data sets to summarize, communicate, and support different interpretations of real-world phenomena ● ELA: SL.11-12.2. Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source. 	
<p>Highlighted Career Ready Practices and 21st Century Themes and Skill</p> <ul style="list-style-type: none"> ● 9.4.12.CI.1: Demonstrate the ability to reflect, analyze, and use creative skills and ideas.

		accommodations/modifications per a student's IEP or 504 plan.		
Student Learning Objectives: We are learning to/that...	Student Strategies (Mathematical Practices)	Formative Assessment	Activities and Resources	Modifications/Accommodations (ELL, Special Education, Gifted, At-Risk of Failure, 504)
Find relative maximum and minimum points.	SMP 7. Look for and make use of structure.	Find all relative extrema: $f(x) = \frac{-8x}{x^2+1}$	Instruction using online textbook material, video, teacher prepared notes, and exercises. Introduce first derivative test.	Extended time, use of calculator, challenge work and specific other accommodations/modifications per a student's IEP or 504 plan.
Find inflection points.	SMP 7. Look for and make use of structure.	Find all points of inflection: $y = x^{3/5} - 5$	Instruction using online textbook material, video, teacher prepared notes, and exercises. Introduce the second derivative test.	Extended time, use of calculator, challenge work and specific other accommodations/modifications per a student's IEP or 504 plan.
Find vertical, horizontal, and slant asymptotes, or state that there are none.	SMP 7. Look for and make use of structure.	Find all asymptotes: a) $y = x^4 - 2x^2$ b) $g(x) = \frac{2x+5}{x+1}$	Recall skills from Unit 1. Incorporate into the curve sketching process.	Extended time, use of calculator, challenge work and specific other accommodations/modifications per a student's IEP or 504 plan.

Key: ■ Major Cluster □ Supporting Cluster ⊙ Additional Cluster

**Hillsborough Township Public Schools
Calculus CP Mathematics Curriculum**

Sketch a curve through sign analysis (chart or number line).	SMP 6. Attend to precision.	Sketch the graph of the function: $g(x) = \frac{x^2-2x+2}{x-1}$	Demonstrate the full curve sketching process; must provide exact values and use correct notation.	Extended time, use of calculator, challenge work and specific other accommodations/modifications per a student's IEP or 504 plan.
Find the absolute maximum and minimum values on a closed interval.	SMP 7. Look for and make use of structure.	Find the absolute maximum and minimum values of the function, if they exist, on the indicated interval. $f(x) = x^3 + x^2 - x + 1; [-2, \frac{1}{2}]$	Instruction using online textbook material, video, teacher prepared notes, and exercises. Compare methods used for open or closed intervals.	Extended time, use of calculator, challenge work and specific other accommodations/modifications per a student's IEP or 504 plan.
Sketch a graph given clues about the function, first derivative, and/or second derivative.	SMP 7. Look for and make use of structure.	Sketch a graph using the following information: The function is decreasing when $x=-3$, $f'(-3)<0$, $f(-3)=8$; $f'(9)=0$, the function is concave up at $x=9$, $f(9)=-6$; $f'(2)=0$, $f(2)=1$	Perform curve sketching process, given information about the function. Construct a sign chart.	Extended time, use of calculator, challenge work and specific other accommodations/modifications per a student's IEP or 504 plan.
Apply knowledge of derivatives to help solve word problems, and explain evidence of maximums or minimums using calculus vocabulary.	SMP 7. Look for and make use of structure.	The cost of widgets can be modeled by the equation $c(d) = 3d^5 - 60d + 100$, where d is the number of days that widgets have been in production and c is the cost	Primarily by example, apply methods learned to a variety of word problems.	Extended time, use of calculator, challenge work and specific other accommodations/modifications per a student's IEP or 504 plan.

Key: ■ Major Cluster □ Supporting Cluster ⊙ Additional Cluster

Calculus CP Mathematics Curriculum

<p>☉ Write a Taylor Series for a composite function using the series for an elementary Taylor Series.</p>	<p>SMP 8. Look for and express regularity in repeated reasoning.</p>	<p>Write a fourth degree Taylor Series for $f(x) = e^{x^2}$ centered at $x = 0$.</p>	<p>Review properties of composite functions to bridge between past knowledge and apply to new understanding. Verify reasoning graphically using Desmos or graphing utility.</p>	<p>Extended time, use of calculator, challenge work and specific other accommodations/modifications per a student's IEP or 504 plan.</p>
<p>☉ Use a Taylor Series to solve a problem that cannot be solved using other techniques of integration.</p>	<p>SMP 1. Make sense of problems and persevere in solving them.</p>	<p>Look for and express regularity in repeated reasoning. Use a fourth degree Taylor Series to approximate the value of $\int_0^2 e^{x^2} dx$.</p>	<p>Activity to compare values obtained using this method versus those obtained using numerical integration techniques.</p>	<p>Extended time, use of calculator, challenge work and specific other accommodations/modifications per a student's IEP or 504 plan.</p>
<p>Benchmark Assessment</p> <ul style="list-style-type: none"> • Cumulative Benchmark 		<p>Modifications/Accommodations (ELL, Special Education, Gifted, At-Risk of Failure, 504)</p> <ul style="list-style-type: none"> • Extended time, use of calculator, challenge work and specific other accommodations/modifications per a student's IEP or 504 plan. 		
<p>Summative Assessment(s)</p> <ul style="list-style-type: none"> • Applications of Integration Common Assessment • Performance Assessment: Select one of several applications of integration.. 		<p>Modifications/Accommodations (ELL, Special Education, Gifted, At-Risk of Failure, 504)</p> <ul style="list-style-type: none"> • Extended time, use of calculator, challenge work and specific other accommodations/modifications per a student's IEP or 504 plan.
